EDUCATION

New York University Abu Dhabi   Abu Dhabi, UAE
Bachelor of Science in Computer Science, **GPA 3.96**   May 2023
Minors: Applied Mathematics, Interactive Media
Relevant Coursework: Computer Systems Organization, Linear Algebra, Probability and Statistics, Operating Systems, Intro to Machine Learning, Software Engineering, iOS Programming, Bigdata

SKILLS

Programming Languages: Python (Including Pandas, NumPy, BeautifulSoup, Pgmpy, scikit-learn), JavaScript, TypeScript, CSS (Including Bootstrap 4), C++, Swift, Spark, TensorFlow, SQL,
Framework & Tools: Git, Docker, Jira, Figma, GraphQL, React, Firebase, MongoDB, PostgreSQL, ExpressJS, Mocha, Cypress

Research Experience

New York University Abu Dhabi   January 2022 – Present
Machine Learning Researcher   Abu Dhabi, UAE
- Developed, trained and deployed a **supervised machine learning model (NN)** on mobile browser (**Kotlin**) to classify JavaScript code that improved the page load time performance of mobile web pages by 27%
- Generated a comprehensive dataset of 127,000 JavaScript elements labeled with categories by extracting 500,000 elements from 20,000 popular web pages
- Conducted evaluations of six supervised learning models for JavaScript classification and performed browser performance analysis utilizing **WebPageTest**.

Center For Global Sea Level Change   May 2021 – August 2021
Machine Learning Intern   Remote
- Implemented and evaluated a probabilistic model for predicting long-term shoreline changes given geomorphological and geologic settings under different sea level rise scenarios
- Conducted processing, interpolation, projection, etc. on geospatial data to build a dataset of over 12 million data points
- Wrote customized **Python** scripts to create maps intersection and model prediction that shortened run time from over 6 hours to under 20 minutes.

Work Experience

Vanilla   June 2022 – August 2022
Software Engineering Intern   Los Angeles, CA
- Designed and built components using **React** and **Typescript** to improve the user in-app experience
- Collaborated with the Product Team on the engineering design doc to implement three new features
- Updated the **GraphQL** layer built on top of **Rails** to allow retrieval and updates of attributes on the PostgreSQL database
- Updated unit tests and end-to-end tests using **Minitest** and **Cypress** to ensure code coverage higher than 85%**.**

Billion Oyster Project   August 2021 – December 2021
Data Analyst   New York, NY
- Conducted in-depth data analysis of 10 years' worth of rainwater and water quality collected under the Citizens' Water Quality Testing Program, utilizing statistical techniques and data visualization tools such as **Python, Excel** and **MySQL**
- Prepared 5 comprehensive reports and presentations to communicate results and findings to stakeholders, including NY state agencies, community organizations, and the general public
- Coordinated a team of 4 to organize, analyze, and report data for the Citizens' Water Quality Testing Program.

PROJECTS

DYOR: Crypto Analysis Web App (MERN stack)   GitHub
- Led a team of 3 to implement sentiment analysis, price prediction, and easy-to-access coin portfolio features on a web application for crypto investors.

Face Mask Detection using transfer learning (CNN, OpenCV)   GitHub
- Developed a complete face tracking and face mask detection solution to monitor mask guidelines violations in real-time
- Tuned hyperparameters and added regularization on the **convolutional neural network** to achieve an accuracy of 90%.

LEADERSHIP ACTIVITIES

Microsoft Student Learn Ambassador (Microsoft)   April 2022 – Present
Vice President (HackAD)   January 2021 – May 2021
